Digital Ghuru
"YOUR DIGITAL GROWTH PARTNER"

AI SUPER KIDS

AI FUTURE LEADERS

GRADES 11–12

Build Your AI Future

Advanced learning for higher education, AI careers, entrepreneurship and responsible technology leadership.

SCHOOL PARTNERSHIP PROGRAM

LEARN **DEVELOP** **BUILD** **LEAD**

AI TECHNOLOGY

Programming, data and intelligent applications

GRADES 11–12

Course Modules 01–08

Students develop practical foundations in programming, data analysis, machine learning and connected AI services.

01 Python Fundamentals
Use variables, conditions, loops and functions.

02 Data Handling with Python
Organise, clean and analyse simple datasets.

03 Data Visualisation
Communicate findings through clear charts.

04 Machine Learning Fundamentals
Understand data, features, models and predictions.

05 Generative AI and Language Models
Explore modern content and task support.

06 Prompt Engineering
Use context, constraints, examples and formats.

07 Application Programming Interfaces
Learn how applications exchange information.

08 AI Automation
Connect tools, data and AI-supported workflows.

TECHNICAL LEARNING PATH

- Code
- Analyse data
- Model concepts
- Connect tools
- Automate
- Build applications

Technical foundations for higher education and portfolio projects

88259 48859

CAREER READINESS

Entrepreneurship, portfolio and professional preparation

GRADES 11–12

Course Modules 09–16

Students connect technical learning with product development, career pathways and professional communication.

09 AI Product Development
Plan an AI service around a clear user need.

10 Market and User Research
Study users, industries and current solutions.

11 Business Models and Startup Strategy
Explore value, customers, revenue and costs.

12 Introduction to AI Agents
Understand tool use and multi-step task planning.

13 Future AI Careers
Explore technical, product and research pathways.

14 Portfolio Development
Organise projects, presentations and achievements.

15 Resume and LinkedIn Preparation
Present skills and experience professionally.

16 Interview and Presentation Skills
Explain projects clearly and confidently.

CAREER PREPARATION

- Career pathways
- Portfolio
- Resume
- Interview
- Entrepreneurship
- Professional conduct

Clearer direction for higher education, careers and entrepreneurship

AI CAPSTONE PROJECT

Technical capability, product thinking and leadership

GRADES 11–12

From Learning to Leadership

The capstone combines technical knowledge, research, responsible design, testing and presentation.

CAPSTONE DEVELOPMENT PROCESS

1. IDENTIFY
2. RESEARCH
3. DESIGN
4. DEVELOP
5. TEST
6. IMPROVE
7. PRESENT

FINAL SUBMISSION

- ✓ **Problem and verified research**
- ✓ Technical workflow
- ✓ Testing and improvements
- ✓ Product potential
- ✓ **Data and AI method**
- ✓ Prototype or proof of concept
- ✓ Responsible AI review
- ✓ Final demonstration

SUGGESTED CAPSTONE AREAS

Education · Healthcare awareness · Agriculture · Sustainability · Accessibility · Local business · Community development

STUDENT PORTFOLIO Python • Data projects • AI activities • Product concepts • Capstone • Certificates

LEARNING OUTCOME

Technical Capability + Career Readiness + Responsible Leadership
